PROFILE

Fifth-year computer engineering student strong ability to self-study, quickly grasp new technologies, and deliver accurate work under any conditions. Driven by excellence, I actively seek opportunities for personal growth and aim to contribute to impactful projects.

WORK EXPERIENCE

village management system

2024 - PRESENT

React ,js

- The Village Management System is designed to manage and display information about various villages, including their demographics, geographical data, and administrative details. The project will be developed in three phases, each focusing on different aspects of the application.

Event planner

2024-2024

Java project

- I created an application for organizing parties and weddings to organize them and meet their needs in Java language and its own interfaces.

Ecommerce

2023-2024

Web development

- I created an e-commerce website for clothes and shoes using html , css, javascript, mysql
